Phillips Precision introduces The Skinny-Vise™, a low-profile fixture solution for small parts on CMM and vision inspection applications.

BOYLSTON, Mass. February 1, 2019 – The industry's first and only truly universal and modular inspection system - **Inspection Arsenal®** - adds even more versatility with the all new Skinny-Vise™. Improve visibility, and repeatability on your CMM and Vision Systems. With the gentle twist of the thumb screw, inspectors can easily hold small, thin and odd parts with simplicity and precise repeatability.

“Expose more of the part and keep the clamp as non-intrusive as possible.” Explains Victor Rinaldi, Product Engineer at Phillips Precision. “[With the Skinny-Vise™,] you can easily see past the fixture on vision systems and CMM probes can easily access nearly 100% of the surface of a part.”

The static jaw is adjustable up to 1.25”, while the locking jaw is easily engaged with just a quick, gentle twist. Allowing for incredibly fast swaps and repeat inspection of very thin, small parts. Soft aluminum jaws can be customized to hold parts of all shapes including pins and spheres and the vise base can be mounted in any direction desired, giving inspectors even more options to hold

parts more efficiently than ever before.

Modular inspection with Inspection Arsenal® is the new revolution in inspection fixturing. Finally offering LEAN solutions to break bottlenecks that plague inspection labs everywhere. Build fixtures just once and add them to the job box, quickly swap between unlimited fixtures on one machine or use one fixture across unlimited machines.

Phillips Precision continues to press on with bleeding edge inspection fixturing solutions. With affordable, simplistic effectiveness, Inspection Arsenal® offers universal fitment with all other fixturing, fast ordering options and in stock, ready to ship product. Adapting to modular fixturing is easy, stress free and so low cost, that ROI is nearly immediate.

For additional information visit inpectionarsenal.com where you'll find case studies and demo videos on all products that show just how fast and easy Inspection Arsenal™ is to use.

About Phillips Precision, Inc.

Phillips Precision Products Division of Boylston, Mass. designs, develops and markets work-holding products for manufacturers in addition to custom fixture design services for inspection and laser marking processes.
