Phillips Precision

Fixturing—Simple by Design.

INSPECTION[™]
ARSENAL

LASER[™]
ARSENAL

BOYLSTON, Mass. August 15, 2018 – Phillips Precision’s Products Division announces its new Vision Corner Block as part of the Inspection Arsenal® LEAN, Quick-Swap inspection fixture system. Not only does Phillips Precision offer the only quick-swap standard fixture systems, but they provide quick, creative fixture design and quick shipping of your orders. Inspection Arsenal® tooling will help optimize your inspection process and uncover hidden profits.

This unique corner block for vision inspection allows COMPLETE access to the entire edge of the part without interruption. Use the pin-ball like spring feature to nudge the workpiece away from the corner block to a repeatable distance. The dock is slotted for a universal fit to most any vision stage. Simply shift in any direction to catch the hole pattern. Add more than one corner block to the stage or to Open-Sight™ fixture plates to inspect multiple parts.

Inspection Arsenal® will **protect your company profits** in many ways.

- Enjoy a rapid return on investment
- Inspect more parts per shift
- Create multiple quick-swap setups per CMM
- Move fixtures from one machine to another
- Increase the number of employees who inspect
- Adapt and reuse existing fixtures effortlessly
- Access granite surface easily
- Use CMM palletization features
- Work toward lights-out inspections
- Use as dedicated tooling - add it to your job box
- Ships immediately, as product is ready-made

Inspection Arsenal® complements other fixturing you may have and the value makes converting from other techniques very cost effective. Plates with air-glide feature are made to order. Standard Loc-N-Load™ product is ready-made and the company has a same-day shipping policy so an order today can be improving efficiency by tomorrow.

For additional information visit www.phillips-precision.com where you'll find case studies and demo videos on all products that show just how fast and easy Inspection Arsenal® is to use.

About Phillips Precision, Inc.
